

**NewYork-Presbyterian Healthcare System – New York Hospital Queens
& The Rogosin Institute**

Symposium

**Tuesday, November 20, 2012
8:30 a.m. - 12:30 p.m.**

**The Rockefeller University
Caspary Auditorium
1230 York Avenue
New York, NY 10021**

8:00 – 8:55 a.m. REGISTRATION & CONTINENTAL BREAKFAST		
8:55-9:00a.m.	Welcome & Introduction	Wayne Osten Senior Vice President and Director NewYork-Presbyterian Healthcare System Barry H. Smith, MD, PhD President & CEO, The Rogosin Institute
The Future of Dialysis		
9:00 – 9:30 a.m.	Opportunities to Improve Care for Patients with Kidney Disease	Doug Johnson, MD Vice Chairman, Dialysis Clinic, Inc.
9:30 – 10:00 a.m.	The Future of Dialysis: The New York Non-Profit Perspective: A New York State Small Dialysis Organization's Experience with Home Hemodialysis	Wayne Evancoe CEO, The Rubin Dialysis Centers
10:00 - 10:30am	Medication Therapy Management under the ESRD Bundle	Harold Manley, Pharm. D Director, Medication Management & Pharmacovigilance, Dialysis Clinic, Inc, Albany, NY area
10:30-10:45a.m. BREAK		
Re-Imagining the Dialysis Unit Education, Outreach		
10:45 – 11:15 a.m.	The Mississippi (and Iranian) Health Outreach Models: Health Connect	Aaron Shirley, MD Chairman, Board of the Jackson Medical Mall Associate Professor, Pediatrics, University of Mississippi Medical Center
11:15 – 11:40 a.m.	Community Health Outreach in the Mississippi Delta: A Culture of Equity	Aurelia Jones-Taylor, MBA, CEO Aaron E. Henry Community Health Services Center, Inc. Clarksdale, MS
11:40 – 12:10pm	Panel: Speakers and Audience: Consensus Discussion on the Management of End-Stage Renal Disease: New York Leads the Way!	Jonathan Lorch, MD Chief Medical Officer, Dialysis The Rogosin Institute Chaim Charytan, MD Director, Division of Nephrology, New York Hospital Queens Director, Dialysis, New York Hospital Queens
12:10 – 12:15pm CLOSING REMARKS AND ADJOURNMENT		

Keynote Speaker

Doug Johnson, MD
Vice Chair, Dialysis Clinic, Inc.

Doug Johnson, M.D. is Vice Chairman of the Board for Dialysis Clinic, Inc. (DCI). He has served on the Board of Trustees for more than fifteen years. He received his medical training at Vanderbilt University, graduating in 2006; and completed his internal medicine training at University of Tennessee/Baptist Hospital in June 2009.

At DCI, Dr. Johnson gives input concerning strategic, operational and medical decisions for the company. Since returning to DCI in 2009, he has helped to implement initiatives to ensure financial stability of the company while also helping to develop tools to ensure excellent patient outcomes and improve patient care. At DCI, we see the new bundled payment system as an opportunity to improve care by taking advantage of certain unique aspects of the new payment system. We see integrated care as the next step in improving care for kidney patients.

Dr. Johnson also serves at DCI Donor Services, Inc., a non-profit company that operates organ procurement organizations in Tennessee, New Mexico and Northern California. In addition, he sees patients in his internal medicine practice twice a week.

Speakers

Wayne Evancoe is the CEO/Renal Administrator of the Hortense and Louis Rubin Dialysis Center, Inc. in New York State. He is a graduate of the SUNY Potsdam, The Sage Colleges Graduate School (M.S.), and the Rensselaer Polytechnic Institute – Lally School of Management and Technology (Graduate Certificate) and is the President-Elect of the National Renal Administrators Association. Serving upstate New York, the three Rubin dialysis centers have become one of the most innovative end-stage renal disease management centers in the country, with a very strong home hemodialysis program. Twenty-seven percent of the Rubin patients are on home dialysis. His aim is to maximize the quality and convenience of the care options patients receive, while securing the resources that his excellent teams of caregivers and support staff can use to improve and strengthen dialysis modalities. Familiar with the regulation environment that is unique to New York, Mr. Evancoe will show how his system has evolved and prospered focusing on HHD, and assess challenges in the future of dialysis, and its many challenges, in New York State using his unique perspective. He will pick up where Dr. Johnson left off to bring the assessment of the challenges and opportunities facing the care of end-stage renal patients to a focus on a small Provider, New York State experience.

Harold Manley, Pharm.D., is Director, Medication Management and Pharmacovigilance at Dialysis Clinic, Inc, centered in Albany, N.Y. . Dr. Manley brings nineteen years of professional experience in various settings including community and institutional pharmacy, academia, government health plans administration, and disease management with a focus on renal disease. As a Clinical Associate Professor at the University of Buffalo, he collaborated with the NYS Department of Health with an emphasis on statewide prescriber education and drug outcomes/utilization review for over 5,000,000 Medicare beneficiaries. As Director of Clinical Pharmacy for a large commercial provider of end-stage renal disease care, he oversaw a nationwide interdisciplinary medication therapy management program for over 5,000 patients, two Medicare demonstration projects and five ESRD special needs plans, as well as interdisciplinary team education and training and the use of bioinformatics to improve medication prescribing and adherence and minimize adverse events. His talk will detail innovative approaches to the management of medical therapeutics and the improvement of patient care and outcomes in an age of diminishing resources.

Aaron Shirley, M.D. brings long-term real-world experience and innovative approaches, as well as an incredible humanitarian commitment, to the provision of healthcare to disadvantaged populations, with his direct experience over the past fifty years having been in both urban and rural settings in Mississippi. A graduate of Tougaloo College and Meharry Medical College, he was for a long time, the only African-American pediatrician in the state of Mississippi, with the distinguishing record of traveling across the state to care for sick children and also installing wells to provide clean drinking water. His innovative approaches to medical care have earned him a MacArthur Fellowship, membership in the Institute of Medicine in Washington, DC and the Citizens' Health care Working Group, and countless other awards. He is Chairman of the Board of the Jackson Medical Mall

Foundation, with the Jackson (MS) Medical Mall's mission to [foster a](#) holistic approach to healthcare for the underserved and to promote community and economic development in the Jackson Medical Mall area. The mission of the Mall recognizes that good health and better health is very much a product of the surrounding society and its own health. In addition, Dr. Shirley founded HealthConnect in 2010. This program is modeled after a community health program in Iran and sends doctors and nurses to poor rural homes to improve health and reduce ER visits. In other words, it puts medical care where much of it belongs, where people live and work. This program was written up in the New York Times Magazine this past summer because of its innovative and effective impact.

Dr. Shirley will bring his experience to bear on the question of how we can make our care of end-stage renal patients more effective, in particular how we can reach those who need much more help than they are currently getting and how we can make our dialysis units more effective for patients both in terms of better health and quality of life. He will challenge us all to think and act differently – to reduce the health disparities that are so evident with renal disease and to produce dialysis clinics that are truly without walls.

Aurelia Jones-Taylor, MBA, is CEO of the Aaron E. Henry Community Health Services Center, Inc. which operates clinically in six Mississippi counties from ten sites with over 150 employees and a \$10,000,000 a year budget. Its newest facility, and her office home is in Clarksdale, Mississippi, which is in the heart of the Mississippi Delta and the birthplace of the blues. Ms. Jones-Taylor took over the Aaron Henry Center in 1989, after training in community health center directorship at Johns Hopkins University. She took a failing non-profit operating on \$190,000 and turned it into what it is today, a remarkable contribution to the betterment of the health and quality of life of the people of one of the most economically disadvantaged regions of the country. She has even built a transportation system (the Delta Area Rural Transport System or DART), which provides over 207,000 trips per year for employees, people who need to get to work, the elderly, disabled, mental health work, shopping and social service needs. Ms. Jones will teach us lessons regarding effective outreach to communities that we can begin to incorporate into our end-stage renal disease management approaches and begin to have an impact on the reduction of risk factors and the prevention of disease. Again, the challenging message involves getting us to think more broadly about what we do so that we take the lead in addressing renal disease and its health disparities much more effectively, leading the way for New York State.

Moderators

Chaim Charytan, M.D., serves as director, Division of Nephrology at New York Hospital Queens. After receiving his B.A. from Yeshiva University, Dr. Charytan trained in Medicine at Albert Einstein College of Medicine. He completed his residency in Medicine at Bronx Municipal Hospital and his fellowship in Nephrology at Boston University and Boston City Hospitals. When he was in the United States Air Force, Dr. Charytan served as chief, Renal Section Renin and Aldosterone Laboratory.

Dr. Charytan is also a clinical professor of Medicine at Weill Medical College of Cornell University. His special interest is in renal dialysis and he functions as director, Dialysis Units at New York Hospital Queens. His research interests include nutrition and anemia in patients with chronic renal disease, dialysis adequacy and hypertension.

His contributions to the medical journal literature are voluminous and he has authored chapters for textbooks on a variety of topics in nephrology. Dr. Charytan sits on a number of local and national nephrologic committees and on the editorial board of several nephrology journals.

Dr. Charytan is certified in Internal Medicine and Nephrology

Jonathan Lorch, M.D. is Chief Medical Officer - Dialysis for Rogosin Institute, Medical Director of their Manhattan Unit and Director of Medical Informatics for The Institute. His area of research is the use of medical information to improve patient outcomes. He is co-author of the only extant paper in the medical literature to show that an electronic medical record of a particular design can reduce patient mortality. His current work is on metabolic bone disease and how its therapy should be designed when oral medications enter the bundle on Jan 1, 2014.

The Rogosin Institute mission is to provide the best possible health care and quality of life for people with kidney disease, as well as those with diabetes, lipid and cardiovascular disorders, and cancer.

The Institute combines a multifaceted, integrative approach to compassionate clinical care and disease prevention with:

- Innovative, cutting-edge research
- Policy analysis and development
- Humanitarian outreach

The Rogosin Institute is committed to produce a unique applicable model for optimal, cost-effective health care and health promotion.

New York Hospital Queens is a member of the NewYork-Presbyterian Healthcare System and an affiliate of the Weill Medical College of Cornell University. New York Hospital Queens is committed to being a premier healthcare institution serving our greater community by providing excellence in clinical care and patient safety, education, clinical research, and service.

For more information, visit www.nyhq.org.

The NewYork-Presbyterian Healthcare System is a federation of 24 general acute care hospital sites in New York, New Jersey and Connecticut, as well as specialty institutes, continuing care facilities and ambulatory providers. The System is dedicated to increasing access to care, promoting quality and patient safety through the emulation of best practices. Acute care members are academic affiliates of one of two Ivy League medical schools: Weill Cornell Medical College of Cornell University and Columbia University College of Physicians and Surgeons.
